

3rd International Workshop on Signal
Processing Applied to Rotating
Machinery Diagnostics

SIGPROMD'2025

9-10 November 2025
Setif, Algeria

Call for papers

The Institute of Optics and Precision Mechanics- Setif 1 University Ferhat Abbas and its Laboratory of Applied Precision Mechanics (LMPA) organize the 3rd International Workshop on Signal Processing Applied to Rotating Machinery Diagnostics **SIGPROMD'2025**. This event is held in collaboration with the Laboratory of Mechanics, Modeling and Manufacturing (LA2MP) of the National School of Engineers of Sfax (ENIS) – Sfax University - Tunisia

This workshop aims to be a forum for researchers, engineers, and students to exchange the latest developments in signal processing techniques applied to the diagnostics and monitoring of rotating machinery.

Topics

- ❖ Vibration and acoustic in mechanical systems and structures
- ❖ Condition monitoring in non-stationary operations
- ❖ Vibro-acoustic diagnosis and pronosis of machinery
- ❖ Advanced Signal processing techniques
- ❖ Artificial intelligence applied to machinery fault diagnosis
- ❖ Modelling of dynamics in machinery and structures
- ❖ Reliability and Lifecycle Management
